

CASE STUDY 3: HIGHWAYS

Project: Project Align
Project value: £2.6 million
Client: Highways Agency
Main Contractor: SERCO
Dates: July 2008 – ongoing

Background:

The UK Highways Agency needed to install new Automatic Number Plate Recognition (ANPR) camera sites and traffic monitoring sites to extend the network's coverage around the UK.

Scope of work:

The project entails:

- Booking road space and negotiating with Highways Agency agents
- Providing traffic management services for the project
- Civil enabling works to facilitate the installations
- Duct and cable installation
- Pole installation, retaining wall, crash cushion and step construction
- Loop cutting
- Power connection works to REC supply
- Power commissioning and certification
