

**Kelly Integrated Transport Services Ltd**

**Siemens Kings Cross JT-41-SKC**

Client: Network Rail  
Main Contractor: Siemens  
Dates: June 2006 – June 2007

**Background:**

The Concentrator Renewal Scheme covered the mainline between Kings Cross to Hitchin.

Network Rail contacted Siemens for the implementation of the Concentrator renewal and associated Telecoms; Siemens in turn awarded the work to Kelly I.T.S. following competitive tender.

**Scope of work:**

The services provided were as follows:

- Installation of Signal posts and bases
- Signal posts, Point zone, anti vandal and level crossing telephone installation
- Installation of all tail cables
- Joining, testing & terminating of all tail cables

**Key Success factors and Innovations:**

We delivered the contract on time and within budget despite incredibly tight timescales including working all through Christmas and possessions. Built up an excellent relationship with the client which proved a key part in our bid for the Colchester to Clacton contract.
